Vent-A-Hood® Wins ADEX Award

RICHARDSON, Texas – Vent-A-Hood®, the company that created the modern residential range hood, was honored with a 2005 ADEX award from Design Journal. The Magic Lung®, Vent-A-Hood's patented centrifugal blower system, received a platinum award, the program's top honor.

"ADEX represents the best in the international design community, which makes this award a wonderful gift," said Blake Woodall, director of sales for Vent-A-Hood. "It recognizes our passion for proprietary technology that strives for the best performance, matching form and function to achieve the highest quality possible for our products."

The Magic Lung® is Vent-A-Hood's signature blower that traps all cooking contaminants, liquefies grease vapor and removes heat-polluted air. It is available in 300 to 1200 CFMs of air movement, is easy to clean and fire safe, and is standard in every Vent-A-Hood range hood.

Design Journal, the international trade publication for interior designers, architects and facility managers, introduced the Awards for Design Excellence in 1994 as a way of recognizing superior product design. An anonymous panel of professionals representing a cross section of the design industry conducts all voting for the ADEX Awards. Each category has potential for three award levels of platinum, gold or silver. This year, 300 products were recognized with an ADEX award out of a field of 1400 entries in 91 categories.

About Vent-A-Hood:

Founded in 1933, Vent-A-Hood, based in Richardson, Texas, is the oldest manufacturer of residential range hoods in America. Each product manufactured by Vent-A-Hood is individually engineered for performance in addition to style. Vent-A-Hood products are sold in all 50 states as well as Canada.
