### **Vent-A-Hood Debuts New Hood Designs for BBQ and Wok Cooking**

RICHARDSON, Texas – [Vent-A-Hood](http://www.ventahood.com), the company that created the modern residential range hood, has unveiled the first hood on the market specifically designed for wok cooking. Known as a form of food preparation that emits some of the highest levels of cooking contaminants, Vent-A-Hood has answered the needs for easier grease extraction and cleaning with a revolutionary design called the “E-Z Clean Tray.”

“Our research and design team have done an incredible job to maximize the ventilation capacity and grease extraction of our range hoods for the growing number consumers who love to cook with a wok,” said Mark Klein, director of sales for Vent-A-Hood. “And a special Bar-B-Q Kit has been added to take this same level of high performance to the outdoors just in time for summer.”

The E-Z Clean Tray is a stainless steel tray that fits under the Magic Lung, making it more convenient to dispose of the grease that is captured from heavy cooking and frequent use. Applied to any existing Vent-A-Hood canopy, the slide out tray can be used in indoor range hoods where Asian cooking and woks are growing in popularity. It can also be added to outdoor range hoods as an ideal feature over the Bar-B-Q. Both applications improve range hood function, and the tray can be cleaned in a dishwasher for ease and convenience without disassembling the Magic Lung housing.

An added feature for outdoor kitchens is Vent-A-Hood’s new Bar-B-Q Kit. The new 6-inch stainless steel extension fits any 24-inch or 27-inch Vent-A-Hood design, offering maximum canopy exposure over outdoor cooking surfaces to extract heat, smoke, odors and cooking contaminants. By expanding the hood to a deeper 30-inch projection, Vent-A-Hood’s patented Magic Lung blower system sits squarely over the cooking surface leaving room for the retracted Bar-B-Q cover where heat is not produced.

“We are constantly pushing the envelope for energy savings, flawless design and quality function,” Klein said. “Our E-Z Clean Tray and our Bar-B-Q Kit were created to enhance the best dining experiences both indoors and outdoors.”
