MODEL #JWH/A1-236

Designer Tiered Wall Mount Hood with Magic Lung® Blower

Bold horizontal tiers create striking architectural depth, with optional gap fillers available for a seamless, monolithic appearance. Patented Magic Lung® technology delivers exceptional ventilation with remarkably quiet performance through centrifugal filtration, while dishwasher-safe components simplify cleanup.

[1] CFM (cubic feet per minute) measures airflow. [2] Because Magic Lung® blowers use centrifugal filtration instead of traditional baffle or mesh filters, they move air more efficiently. When comparing to other brands, use Equivalent CFM to understand real-world performance. [3] Sones measure perceived loudness—lower values indicate quieter operation. Decibel values shown are approximate equivalents. [4] Airflow (CFM) decreases as duct resistance (static pressure) increases. Values at 0.1"–0.3" SP reflect typical installed conditions.
